Mobile Screen Protector

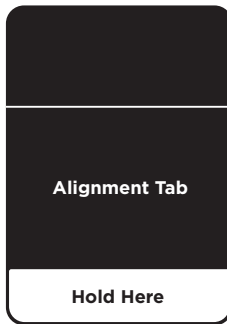

HOW TO APPLY

APPLICATION KIT

x4

x4

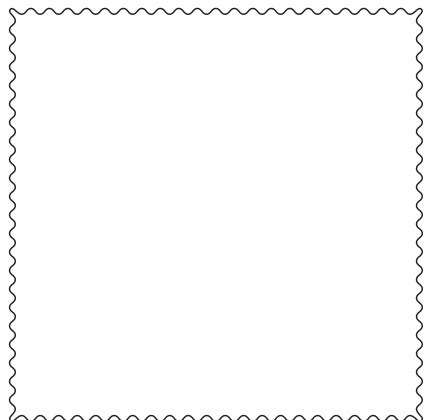

WET WIPES

SQUEEGEE

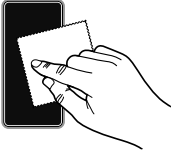

MICROFIBER CLOTH

PLEASE READ ALL THE INSTRUCTIONS AND BE PATIENT WHILE APPLYING THE SCREEN PROTECTOR

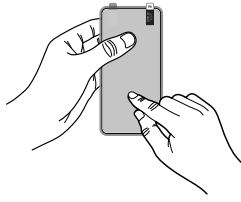

STEP 1

Place your device on a flat surface and make sure you are in a dust free area with enough lighting.

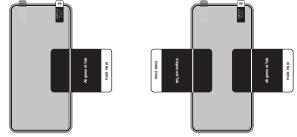

Clean your device screen with the included wet wipe & dry it with the microfiber cloth.

STEP 2

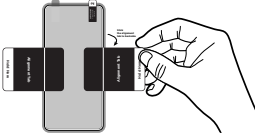

Align your screen protector on the device with the adhesive side (Tab 1) down.

STEP 3

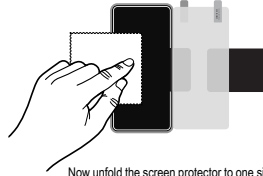

Place the alignment tab on the screen protector with the white line aligned on both side of the device.

STEP 4

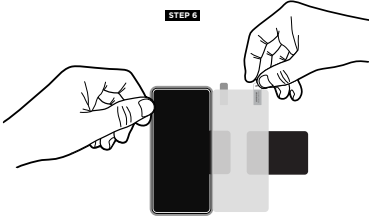

Stick one side of the alignment tab on your device, which makes a hinge to open the screen protector as a book. Make sure the screen protector is perfectly aligned to the screen.

STEP 5

Now unfold the screen protector to one side and clean the device screen. Be patient to remove all dust particles from the screen, use dust removers as needed.

STEP 6

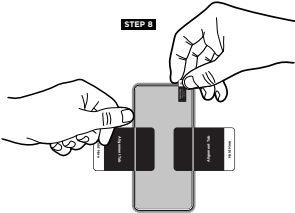

Once the screen is clean, peel off the protective layer by pulling gently on tab 1.

STEP 7

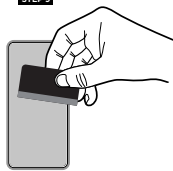

Fold the screen protector holding the alignment tab towards the device. Use the squeegee to apply the protector on the screen. Gently apply pressure with the squeegee to clear any air pockets or bubbles on the screen.

STEP 8

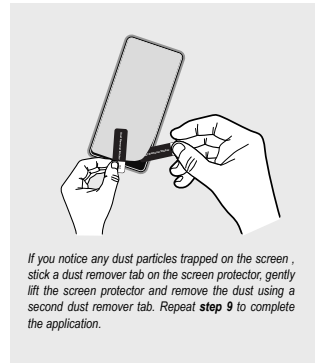

Repeat the above step to clear all air pockets and bubbles. Release the alignment from the side of the device. Hold the screen with one hand and peel off the top layer by pulling tab 2 (surface side).

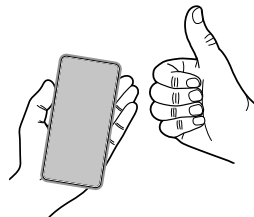

STEP 9

Gently apply pressure with the squeegee to clear any air pockets to finish the application.

If you notice any dust particles trapped on the screen , stick a dust remover tab on the screen protector; gently lift the screen protector and remove the dust using a second dust remover tab. Repeat step 9 to complete the application.

You may see tiny bubbles which may take up to 24 hours to settle.

ATTENTION

GO TO YOUR PHONE SETTINGS AND RESCAN FINGERPRINT AFTER APPLICATION.
